Cambridge English, Cambridge University, Aug 2016

Certified ScrumMaster, Scrum Alliance, Dec 2022

## Languages

Dutch	Native / C2
English	Fluent / C1

## Description

I am a highly motivated developer with experience in a wide range of technologies. I am currently pursuing a master's degree after working for a few years as a full-stack developer by a wide range of companies. Such as banks, medical companies and government institutions. I love what I do which can be seen in my open source contributions and the many side projects I have been working on in the past years. I like to explore the newest technologies within the field and I am always looking for new ways to improve my workflow or new programming languages which can improve my skillset.

I am currently looking to work remotely through my company VonkProgramming based in the Netherlands. Since I am currently studying my hours are very flexible and I am able to work on a wide range of projects. I don't fear diving into new tech stacks.

## Experience

### Quintor

#### Full-stack developer

**10-2020 - 09-2023**

At 'Quintor' in Amersfoort, Utrecht, Netherlands, from October 2020 to October 2023, the role mainly involved working on various software development projects for large clients like ING and different government entities. As part of the experience at Quintor, a traineeship was also completed. This program emphasized learning and implementing best practices for code quality through testing and linting methodologies, which played a significant role in the coding projects.

### ING

#### Full-stack developer

**04-2022 - 09-2023**

The role at 'ING', in Amsterdam, North Holland, Netherlands, began in April 2022 and is still ongoing. It primarily involves serving as a full-stack developer, working on various interfaces that are utilized by ING, employing the Lit element framework. In addition to these duties, for a certain period, the role also encompassed serving as a product owner. This required overseeing project timelines, prioritizing features, collaborating with stakeholders, and making key decisions about product direction. This multi-faceted role demonstrates a blend of technical acumen and leadership ability.

### SVB

#### Full-stack developer

**04-2021 - 04-2022**

At 'SVB', based in Amstelveen, North Holland, Netherlands, the role took place from April 2021 to April 2022. The primary responsibility involved programming in JavaScript, utilizing the Angular framework. An important part of the job was managing a significant transition, migrating an existing system from AngularJS to Angular. This migration required deep understanding of both frameworks, and extensive planning to ensure a seamless transition with minimal disruption. In addition to development work, the role also entailed working on pipelines, which required careful oversight and management to ensure a smooth, efficient workflow and continuous delivery.
